Number of half lives

The half life for radioactive iodine-131 is 8.05 days. How many days would it take for 95% of it to decay?

Number of half lives

The half life for radioactive iodine-131 is 8.05 days. How many days would it take for 95% of it to decay?

Step 1. Use the relation

$$(1/2)^n = \text{amount}$$

Here $(1/2)^n = 0.05$

$$n = \ln(0.05)/\ln(1/2) = 4.32$$

Step 2. multiply by the half life

time = 4.32 (8.05 days) = 34.77 days
